

# GREENHOUSE DIVISION

Advanced Greenhouse Technology

## GREENHOUSE PLANNING & CONSTRUCTION

Professional and personalized consultation from planning to completion

- Plant nurseries
- Greenhouses
- Cannabis
- Agrotech
- Hydroponics
- Growing Control Systems for Greenhouses and Nurseries
- Net houses for vegetables, flowers and orchards

# Greenhouse. Meeting grower's needs

**Nationwide network of 25 branches serving our customers  
Providing fast and efficient professional service and "tailor made"  
solutions according to customer needs,  
field conditions, geographical area and crop type**

Modern agricultural markets are highly competitive and challenging due to the need to increase agricultural yields, while, at the same time, decreasing depletion of natural resources and minimizing damage to environment. Due to these developments, we have witnessed over the past few years the development of various innovative agriculture technologies, including greenhouse technology in Israel and across the globe.

## **The Benefits of Greenhouses:**

- Optimization and savings in fertilization and pest control
- Irrigation and water saving
- Climate control
- Lighting control
- Protection from weather hazards (heat and cold)
- Insect and pest protection
- Detached soil growth platform option
- Improved size and quality of crops
- Option to work on desktop tables
- Soil type and growth substrate control, according to plant type
- Elimination of seasonal dependence in terms of flowering, growth dates, ripening and marketing of produce
- Maximum productivity achievement of agricultural produce per work area

## **Conditions for Successful Greenhouse Construction: Planning and Engineering**

Obtaining the best throughput from the greenhouses begins in the planning stage and in choosing the type and quality of the greenhouse according to the field conditions, geographical area and crop type/ growth

## **Construction**

Building a strong, high-quality, sealed and durable greenhouse with minimum maintenance requirements so that it will last for the long-term

## **Accessories**

Use of the high-quality accessories from the best suppliers

## **Required Greenhouse Accessories:**

Cannabis  
Growing Tables

Nursery Tables

Air Heating

Dutch Water Tanks

Ventilation Systems

**Nationwide network of 25 branches serving our customers  
 Providing fast and efficient professional service and "tailor made"  
 solutions according to customer needs,  
 field conditions, geographical area and crop type**

**The Advantages of Hamashbir Agriculture**

**"Comprehensive Product Offering"**

Hamashbir Agriculture offers a complete solution while maximizing the customer's needs. We provide professional consulting services, beginning from the planning through on-site execution and construction including coverings, accessories and internal control systems.. The Division also carries out complex projects in the field of cannabis, plant nurseries and hydroponics.

**Country-wide Distribution**

Hamashbir Agriculture maintains 25 branches spread out across Israel, providing savings in time and resources and access to every customer and every site. This allows us to tailor our solutions to the specific requirements of any field conditions, geographical area, crop types, etc. Our nationwide deployment also enables service and response, even after installation.

**Leading Suppliers from Israel and Abroad**

Hamashbir Agriculture works with the sector's leading suppliers, enabling an array of high- quality solutions

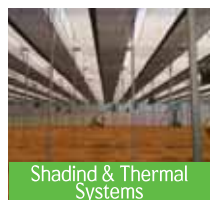

**Extensive Experience and a Skilled Professional Staff**

Our Greenhouse Division is staffed by a team of experts with over 20 years of experience, both in Israel and abroad, in planning, manufacturing and constructing greenhouses, as well as in advanced systems deployed for greenhouses. We have numerous specifications of existing models that can be adjusted to save resources and money.

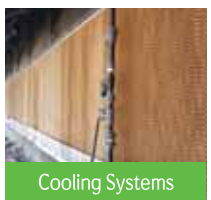

The team provides a comprehensive solution from the planning and price proposal phase up to the construction of the optimal greenhouse, including internal control systems according to area conditions and crop needs. We also provide service solutions post-installation.

**Profitable agriculture and environmental preservation**

All of this allows farmers to engage in profitable agriculture, while using resources more efficiently, employing advanced technologies, maximizing the utilization of existing conditions and preserving the environment.

Shading & Thermal Systems

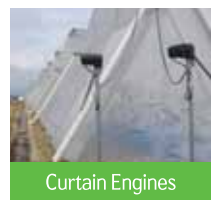

Cooling Systems

Water Heating

Electric Panel

Curtain Engines

**At Your Service Anytime!**

# Hamashbir-gh

Harvesting Success

Providing the most  
advanced crop production technology  
with the goal of maximizing our customers' return  
on investment
